ISO27001 - Get A Lot Of Help Package

Fixed-price, blended consultancy service, live and online

Unrivalled expertise - delivered globally

www.itgovernance.co.uk

Protect • Comply • Thrive

Are you planning to implement ISO27001?

This document provides an outline of the resources and tools available in the Get a Lot of Help package for the effective deployment of an information management system aligned to ISO27001:2013.

Introducing a unique new approach to ISO27001 implementation

IT Governance has developed a specially formulated combination of essential tools and resources you need to get started with an ISO27001 project, even if you have no prior experience of ISO27001 at all.

The **Get a Lot Of Help package** enables you to be guided by an ISO27001 implementation specialist throughout the entire project, without the associated expenses of hiring a consultant to do all the work.

This unique approach to ISO27001 implementation empowers organisations to quickly and cost-effectively assimilate and deploy critical knowledge in a way that enables them to achieve certification and to maintain it in future, all at a cost-effective, fixed price.

Combining expert tools, resources, training and online consultancy, you will receive hands-on guidance at key points of the implementation project, providing assistance and support throughout the project and leading you to towards certification-readiness.

“IT Governance guided us from inception to completion toward successful certification, using an implementation approach and methodology which has proved to be realistic and straightforward. ”

Abel Ureta-Vidal, COO, Eagle

The **Get A Lot Of Help package** offers unparalleled benefits unavailable elsewhere:

- You get a range of expertly developed tools and resources to help you fulfil your ISO27001 implementation requirements.
- We help you set the project framework and timelines so that you can manage the execution of the deliverables according to your own needs.
- You benefit from the personal leadership of, and knowledge transfer from, your implementation coach.
- The costs of extensive consultancy work, travelling and other expenses are totally eliminated.
- Appointments take place at flexible times and at a location convenient to you and your team.
- There is no need to set aside a full day or book meeting rooms to host our consultants at your offices.
- Frequent check-ins with your consultant are made possible using a variety of channels, including online chats, telephone calls, live online coaching sessions and file-sharing services (when the client uses services such as SharePoint).
- Where needed, our consultants can arrange for additional support for your project, which will be billed separately and agreed upfront.

Leverage our ISO27001 expertise 24/7 to protect your information assets anywhere in the world.

The ISO27001 Get A Lot Of Help Package contains:

Three international standards:

- [The ISO27001:2013 Standard](#), which details the requirements against which you will be audited (PDF).
- [The ISO27002:2013 Standard](#), which is the code of practice that provides support for the implementation of information security controls for ISO27001 (PDF).
- [The ISO27000:2014 Standard](#), which contains the terms and definitions referenced in ISO27001 (PDF).

Two essential implementation guides:

- [IT Governance – An International Guide to Data Security and ISO27001/ISO27002](#), which is the UK Open University's postgraduate information security text book that details how to design, implement and deliver an Information Security Management System (ISMS) that complies with ISO27001. (Adobe e-book).
- [Nine Steps to Success – An ISO27001 Implementation Overview](#), which outlines the nine critical steps that mean the difference between ISO27001 project success and failure. (Adobe e-book).

Two critical-skills training courses, delivered conveniently online:

- [ISO27001 Certified ISMS Lead Implementer Online Masterclass](#), a 3-day training course which covers all aspects of implementing and maintaining an ISO27001 project, and leads to the industry-recognised CIS-LI qualification. (Delivered live, online).
- [ISO27001 Certified ISMS Lead Auditor Online Masterclass](#), a 4 ½ day training course which prepares delegates for the planning and execution of ISMS audits in line with ISO27001. Successful completion of the exam leads to delegates acquiring the industry-recognised CIS LA qualification. (Delivered live, online).

Two proven resources to save time and money:

- [vsRisk™](#) - the definitive information security risk assessment tool, provides the framework to automate and deliver ISO27001-compliant risk assessment. Single user licence, delivered via a downloadable link. vsRisk also includes 12 months of free software support and updates.
- [The ISO27001:2013 ISMS Documentation Toolkit](#), which has been created by expert practitioners to provide you with a comprehensive set of pre-written ISMS documents compliant with ISO27001:2013. By using the resources in the toolkit you will save months of work as you get your ISMS up to speed.

Five days of expert-led Mentor and Coach consultancy:

- [Five days' worth of structured consultancy](#), spread out over several hours a week, to ensure that the planning and implementation of your project stays on track to achieve your implementation goals. Delivered online by expert practitioners.

Available anywhere in the world via our exclusive online consultancy service, our mentor and coach consultancy brings you dedicated expertise and specialist knowledge through five days of scheduled coaching and project review sessions with an ISO27001 expert consultant, and covers each key stage of the ISO27001 implementation project.

Protect • Comply • Thrive

About our ISO27001 Mentor and Coach consultancy

With the ISO27001 Mentor and Coach consultancy service, you are in control, which saves you money while you benefit from the expertise of an expert implementation coach.

What you get

- The residual risk report

Selection of controls

- Review and recommendations

Competence and documentation

- Competence framework
- Communication plans
- Staff awareness and training
- Document management process

Performance evaluation

- Internal audit
- Management review
- Improvement
- Preparation for certification
- Review of certification readiness
- Coaching of individuals likely to be involved in the audits
- Help with selecting and appointing an accredited certification body.

“Having IT Governance on hand to guide our swift adoption of the ISO27001 Standard and provide ongoing expert support has been invaluable. They really understood the needs of a technology enterprise like ours.”

Paul Green, Wirefast

The IT Governance Professional Services team has worked with organisations around the world to apply management system standards for more than a decade.

Who will benefit from this Get A Lot Of Help package?

Organisations of up to 500 employees from any industry and situated anywhere in the world will benefit from this package. It will help organisations that have little or no management system expertise, but do have some initial understanding of information security management to achieve their goals quickly and efficiently. This package does not include certification fees which are paid directly to the certification body.

Certification Guarantee

A key aspect of an IT Governance consultancy support programme is that we guarantee our clients that they will successfully achieve certification within the timeline of the agreed project. For our Get a Lot of Help package, this guarantee is also applicable. It is subject to contract, based on the findings of the initial scoping phase and compliance with the agreed resource and project plan. The guarantee ensures that IT Governance Ltd will meet any and all extra direct remedial costs necessary to ensure that the client passes a second and subsequent certification audit.

How does online consultancy work?

The consultancy is provided through a blend of delivery methods, such as telephone or conference calls, Webex sessions, Skype chat and/ or email communications. The blend of communication methods can be adjusted to meet the client's preferred method of communications. Due to the absence of physical meetings and travel, it is possible to have more meaningful engagements, more frequently, at a fraction of the price of an in-person consultancy session.

Why IT Governance?

The IT Governance Professional Services team has worked with organisations around the world to apply management system standards for more than a decade. We can help organisations of any size wishing to embark on the transition process to achieve a certification to the new version of ISO27001. We have consulted on many successful compliance and cultural change projects, with an impressive track record of more than 140 clients successfully certificated to ISO27001 over the past 10 years. Our team is one of the most experienced globally, having worked on projects in a wide range of both public and private sector organisations covering a wide variety of market sectors/segments.
