

ISO 27005 CERTIFIED ISMS RISK MANAGEMENT TRAINING COURSE

Learn the process of conducting an effective information security risk assessment through practical risk management methodologies as promoted by ISO 27005. Presented by an ISO 27001 practitioner offering real-world expertise and insights.

DURATION

3 days

FORMAT

Classroom sessions from 09:00 to 17:00

QUALIFICATION

ISO27001 Certified ISMS Risk Management (RM LI) qualification (ISO 17024-certificated)

COURSE HIGHLIGHTS

Develop your understanding of ISO 27005 and get to grips with the key activities of the ISO 27005 risk assessment process. Find out how a risk assessment works in action using a combination of formal training, practical exercises and relevant case studies. Gain practical experience of the risk assessment processes through discussion, case studies and role play.

WHAT WILL YOU LEARN?

- The role and importance of risk management in an organisation.
- Why risk management is the core competence of information security management.
- Full details of the ISO 27005 information risk management standard and an understanding of key risk management terminology.
- How ISO 27005 is related to the ISO 31000:2009 risk management standard.
- How vsRisk™ information security risk assessment software can help you save time and money.
- How to use risk management to achieve certification and maintain compliance with the ISO 27001 information security management standard.
- 'Hands-on' practical experience in carrying out an effective risk assessment process as defined by ISO/IEC 27005:2011.
- The key information security risk assessment processes, including context establishment, risk assessment, risk treatment and monitoring/review.
- The competence to advise third-party organisations on information security risk management.

“ Fantastic training to compile all my old risk management know-how, in a very good structured way but also according to the ISO regulations. I am going to recommend it to my colleagues and friends.”
